Reverse charge for all kinds of scrap

Last May 12th the Revenue Office has issued memorandum No 43 aimed at reorganizing the scrap and waste division. The 'reverse change' is applied for the sales of scrap, even processed, that after the process remains a wrought by-product or a kind of waste. The 'reverse change' is valid for all services linked to the management of waste and scrap. The sales of scrap conforming to the reverse change regime apply to both 'new' scrap (processing rejects) and 'old' scrap (waste). The regime includes the so-called 'furnace-ready' scrap that even though it's classified as secondary raw material, for VAT purposes it is to be considered as scrap as long as it is remelted thus becoming a new raw material. The memorandum explains when the facilitated rate has to be applied; these cases are mainly linked to the services relating to the waste management, i.e. collection, transport, recovery, disposal, ..read more

Alcan aluminium for the tram of Zurich

Alcan Extruded Products, part of Alcan Engineered Products - a business unit of Rio Tinto Alcan - has obtained a total order of 88 units for the production of car body shells for the Cobra tram. Following the successful four-year development phase and testing of six pilot units of the 37-metre long vehicles, the tram units are scheduled to be delivered to the Zurich Public Transport Authorities in Switzerland by mid-2009. The tailor-made hybrid structure of the Cobra, developed by Alcan Extruded Products for the railcar manufacturer includes high-performance ..read more
