Focus on

Getting cool while waiting for the bus

Of course it's another world, recent history and an unmatched development of the infrastructures where rolled extruded aluminium plays its role. From June to

September, the funny location usually registers temperatures of about 45°C while the combination of low humidity and a temperature of 25°C is considered as a blessing. Another major ingredient is the flow of capitals generated by the large sales of oil extracted everywhere in this territory. Over the last few years, Dubai (you had already guesses it!) has launched the challenge to build a service pole to become the reference for the whole southern area: no expense limit to differentiate and qualify the only option available. The result will be stately sail-shaped hotels build offshore, space-age offices, palm-tree-shaped harbours and the offshore reproduction of the world's continents. All these are energy-consuming projects, and ..read more

Alcoa: new retro wheel

Alcoa Wheel and Transportation Products, a Cleveland, Ohio-based business unit of Alcoa Inc. has introduced a new wheel with a "retro" look to celebrate 60 years of innovation and technology. The new Retro Wheel incorporates styling from the past with innovation from today's technology. Alcoa will offer two new styles for the commercial vehicle aftermarket in a limited edition. The wheels offer all the advantages of Alcoa innovation including classic styling, one-piece forged strength, true running with better heat dissipation for extended tire ..read more

ABB wins \$18-million contract in Dubai

ABB, the leading power and automation technology group, has won an \$18-million contract from Dubai Aluminum Company Limited (Dubal) for additional electrical and automation system upgrades at the company's 480-hectare smelter complex in Dubai. The order follows the \$53-million ..read more
