Russia lands at Alumotive

The 2009 edition of Alumotive was successfully presented during an important Italian entrepreneurial mission conducted in the city of Yaroslavl, Russia, last december.

The mission, organized with the political support of the province of Bergamo and Yaroslavl was led by the President of Federfinitura Giovanni Bonfiglio for the Italian industrial party and by Valerij Lavrov, President of the Chamber of Commerce of Yaroslavl for the Russian entrepreneurial party. The Russian delegation, composed of representatives of the municipality, province and region included other members representing big industrial groups in the automotive, general motor and aeronautical sectors particularly concentrated in the region of Yaroslavl. In fact, these companies, together with istitutional representants, will visit the next edition of Alumotive in an official manner. In the photo: The secretary of Federfinitura ..read more

Feralpi works with Fiat Research Centre

Last Wednesday the 'Giornale di Brescia' dedicated an article to the collaboration project between Feralpi and Fiat Research Centre to participate to the call for applications of the Ministry for the Economic Development. It is a study on energy effectiveness to recover car fluff, the metal residue from car wrecking, by means of a waste-to-energy innovative process. Within 'Industria 2015', part of the 2007 Financial Act, 30 projects were selected that will involve 234 companies and 160 research bodies. The project involving Fiat Research Centre ..read more

Slight drop in sales for aluminium packaging

The production of packaging made partly or completely from aluminium showed a slight decline in 2008. The manufacturers of aluminium packaging produced 393,000 t of aluminium foil, tubes, flexible packaging and aerosol and beverage cans, 8% less than the previous year (427,000

Project for automotive components

There is a variety of data currently available to designers with reference to mechanical behaviour of aluminium foundry alloy fatigue. Unfortunately, however, being as said data is not organised organically, it is difficult to trace. For this reason, the need was recognised for developing
