AL model of the Eiffel tower: fully recyclable!

People world-wide are concerned about the ecological situation and are increasingly willing to take action for a better environment. This can already start at home, at school or at the work-place by collecting and sorting household and packaging waste. Supported by decision-makers and facilitated by numerous initiatives organised by green and consumer groups and the industry, people can themselves actively contribute to a more sustainable lifestyle. In order to visualise this shift towards a growing environmental conscience, the Hungarian aluminium beverage can recycling initiative EAI, the Hungarian packaging waste organisation, Öko-PANNON and the European Aluminium Association (EAA) have embarked on a project which symbolizes this commitment. With the help of hundreds of volunteers, the assistance of the Technical University of Budapest and the support of several local companies

Mille Miglia Museum and Alumotive

Some of the splendid cars that have distinguished the history of Italian racing and are by now an authentic part of the national and international cultural heritage will be transferred from the Mille Miglia Museum to the Garda Exhibition Centre in Montichiari during Alumotive, the most complete showcase of the production of components destined for the transport industry. Two worlds of excellence meeting, establishing a cultural partnership that joins, ideally, that long line that crosses tradition, history and technology. «I want to express the

Hints and remarks from the 8th IARC

On the third issue of 'Alluminio & leghe' we dedicated a long article to the 8th IARC-International Automobile Recycling Congress held last March in Munich. We have chosen three, among the several speeches given over the three days of the congress, that we think are the most significant,
