Aluminium door frames for the green home

With respect to the box "High performance window and door frames" included in the article "Green homes save 30%" by Dario Bellatreccia and published in the Regulations and Taxes - Construction, environment and safety section of Il Sole 24 Ore on 18 May 2009 UNCSAAL (the National Association of aluminium, steel and alloy window and door constructors) specifies that: "... aluminium frames, even with small sections, are perfectly suitable to hold double glazed windows". o From the point of view of thermal insulation the technology of insulated profiles (two metal parts separated by an insulating material, usually polyamide strips) allows the construction of aluminium window and door frames comparable with those made of wood and PVC and in compliance with the current laws regarding energy savings in construction. o In general aluminium profiles, and in particular insulated profiles, have ..read more
