Dallas Cowboys new stadium

The Cowboys' new stadium, scheduled to open at the start of the upcoming NFL season, will incorporate 700,000 pounds (around 320 t) of soft alloy extruded profiles to frame the unitized curtainwall that will be the dominant architectural feature of the stadium's exterior. Sapa Extrusions' Delhi, La., plant will supply the extrusions to Texas Wall Systems (TWS) for the stadium's exterior. Both the aluminium and the glass have been customized to reflect the Cowboys' team colours. The aluminium mullions will be Valspar Cowboy Silver, while the glass panels will be graduated in colour from blue to light grey and silver. Architects were faced with an intriguing challenge in constructing the new Meadowlands Stadium. As the future home of both the New York Giants and the Jets, the stadium needed to be able to accommodate the colour schemes of both teams, depending on which would be calling it

Aluminium: production decline in May in the USA and Canada

Based on Aluminum Association surveys, the U.S. annual rate of primary aluminium production totalled 1,731,124 tonnes during May 2009, a drop of 37.8 percent from the May 2008 total of 2,781,753 tonnes. Compared to the previous month, the annual rate of production declined 1.9 percent from the April 2009 annual rate of 1,764,641 tonnes. The year-to-date annual rate of production for 2009 totalled 1,904,246 tonnes, off 31.2 percent from the 2008 annual rate of 2,768,713 tonnes. Actual production for the month of May 2009 totalled 147,027 tonnes. As
