

Focus on

First year of didactics at work

Making good use of the technical-technological and metallurgical inclination of a whole province by means of a specific corporate training: this is the aim of the 'Didattica in

Fabbrica' project that the 'Luigi Galvani' Technical College in Brescia has implemented in association with Metra starting from school year 2008-2009. The results of this project have been presented last Friday during a press conference where representatives of the Brescian college, of Metra and of the Provincial School Office have taken part in. All the speakers have expressed their satisfaction and have sketched a very positive balance for this year's 'pilot' experience that will be repeated in school year 2010-2011 hoping to turn it into a permanent initiative. Fabrizio Guarino, legal representative of the Galvani College, and Aldo Albini, coordinator of the 'Didattica in Fabbrica' project, have explained the

New training centre for EMAL

Emirates Aluminium (EMAL) opened an onsite specialized training facility that will allow equipment suppliers to train operators and technicians on the processes, procedures and maintenance of the equipment they supply. EMAL also enlarged its onsite mobile equipment training facility to double its original size. The facility allows employees to obtain the required driving licenses necessary to operate heavy machinery within the plant. Further, with the full support of Dubai Aluminium (DUBAL), EMAL inaugurated a newly revamped and more sophisticated

A multipurpose anodising plant for non ferrous metals

During the last years magnesium is increasing in its use for a wide application field, but even aluminium is still commonly used for a lot of different purposes. Even if the two metals have a completely different chemistry and are similar only for mechanical or physical characteristics,

Poor melt quality causes casting defects

Casting defects, such as oxide inclusions, gas porosity, shrinkage porosity, and macro shrinkage are often due to poor melt quality. Nine basic mistakes should be avoided during melting, otherwise defects into the finished component will be unavoidable even before the casting phase
